

Lassi Köykkä

Junior Developer

Profile

Dedicated and self-motivated developer hobbyist and ICT-student originally from Tampere Finland. I thoroughly enjoy problem-solving and challenging myself. On my spare time, I like to work on my personal projects and study new technologies so I can play with them and see what I can come up with. I'm a quick learner and I'm interested in how things actually operate under the hood.

I can work perfectly well alone, but I am more of a team player at heart and I enjoy meeting new people. I can get along with almost anyone, co-worker and customer alike.
